DHIRAJ JADHAVRAO

Associate Staff Engineer | Senior Java Full Stack & Microservices Engineer

Pune, Maharashtra, India | +91 9975692907 | jadhavraodhiraj@gmail.com | linkedin.com/in/dhirajjadhavrao

Notice Period: 60 Days (Negotiable to 30 Days) | Preferred Locations: Pune, Mumbai, Bengaluru, Hyderabad

PROFESSIONAL SUMMARY

Accomplished Java Backend & Full Stack Engineer with 6+ years of experience architecting, developing, and scaling enterprise microservices using Java (8/17/21), Spring Boot 3.x, REST APIs, Hibernate/JPA, SQL, and Google Cloud Platform (GCP). Currently serving as an Associate Staff Engineer at Nagarro, leading cloud migration to GCP (GKE), building resilient distributed systems, and optimizing high-volume API transaction flows. Pioneer in leveraging AI-assisted engineering (GitHub Copilot, OpenAI Codex) to accelerate SDLC velocity, raise automated test coverage to 85%+, and maintain 99.9% uptime. Proven track record across full SDLC, system design, cross-functional Agile delivery, defect root cause analysis, and production support.

TECHNICAL SKILLS

- **Languages:** Java (8, 17, 21), SQL, C++, JSON, HTML/XML
- **Backend & Frameworks:** Spring Boot 3.x, Spring Framework (Core, MVC, Security, Cloud), Microservices Architecture, RESTful APIs, JMS
- **Database & Persistence:** SQL, Hibernate ORM, Spring Data JPA, JDBC, Schema Design, Query Optimization, Transaction Management
- **Cloud & DevOps:** Google Cloud Platform (GCP), Kubernetes (GKE), Docker, Cloud Migration, CI/CD, Git, Maven
- **Testing & Automation:** JUnit 5, Mockito, Postman, API Automation, Regression Testing, Test-Driven Development (TDD)
- **AI & Productivity:** GitHub Copilot, OpenAI Codex, AI-Augmented SDLC, Agentic Coding Workflows
- **Architecture & Practices:** Distributed Systems, Microservices Patterns (API Gateway, Circuit Breaker), Agile/Scrum, Production Support

PROFESSIONAL EXPERIENCE

Nagarro — Associate Staff Engineer

January 2024 – Present | Pune, Maharashtra, India

- Spearheaded the cloud migration of business-critical enterprise modules to Google Cloud Platform (GCP GKE), containerizing workloads with Docker and executing a zero-downtime cutover while maintaining 99.9% application availability.
- Architected and enhanced 15+ RESTful microservices using Java 17/21 and Spring Boot 3, implementing clean architecture and reducing average API response latency by 25%.
- Drove end-to-end SDLC and architectural impact analysis for high-throughput enterprise modules, partnering with product managers, QA, and UI teams to guarantee 100% on-time release milestones.
- Engineered standardized RESTful API contracts with centralized exception handling and strict payload validation, eliminating integration bugs and accelerating UI integration by 35%.
- Automated comprehensive API testing suites using JUnit 5, Mockito, and Postman, elevating test coverage above 85% and significantly curbing post-release regression defects.
- Integrated AI-assisted engineering tools (GitHub Copilot) into development workflows, accelerating unit test authoring and boilerplate generation by 30%.
- Mentored junior and mid-level developers on microservice design patterns, clean coding standards, and root cause analysis (RCA) for complex production incidents.

Nagarro — Senior Software Engineer

June 2022 – January 2024 | Pune, Maharashtra, India

- Designed, developed, and maintained core enterprise backend services utilizing Java, Spring Boot, REST APIs, SQL, and Hibernate for multi-tenant applications.
- Optimized data persistence layers and complex relational queries using Spring Data JPA, cutting database connection overhead and improving throughput by 20%.
- Built automated integration test collections in Postman, cutting manual QA regression cycles and stabilizing bi-weekly production releases.
- Collaborated with cross-functional Agile teams to perform impact assessments, resolve critical defects, and deploy reliable software patches within stringent SLAs.

Josh Software, Inc. — Software Engineer

December 2019 – June 2022 | Pune, Maharashtra, India

- Developed scalable microservices and backend components using Java, Spring Boot, RESTful APIs, and Hibernate deployed on GCP Kubernetes Engine (GKE).
- Constructed robust persistence layers and object-relational mappings (ORM) with Hibernate and PostgreSQL/MySQL, ensuring optimal query performance and data consistency.
- Integrated asynchronous messaging workflows using JMS, effectively decoupling heavy background computations and improving UI responsiveness.
- Implemented and maintained automated unit tests using JUnit and Mockito, reducing defect leakage and maintaining high code maintainability across sprint releases.

ThinkQuotient Software Private Limited — Java Developer Intern

March 2019 – December 2019 | Pune, Maharashtra, India

- Developed foundational backend features using Core Java, OOP principles, and JDBC, participating in full software development lifecycle activities.
- Gained in-depth hands-on experience in enterprise application debugging, code quality reviews, and database integration workflows.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering — Savitribai Phule Pune University | 2013 – 2016

Diploma, Information Technology — Nutan Maharashtra Institute of Engineering & Technology, Pune | 2010 – 2013

LICENSES, CERTIFICATIONS & CONTINUOUS LEARNING

- **OpenAI Codex 101: From Idea to Deployed App** — LinkedIn Learning (Aug 2026)
- **Intro to OpenAI Codex: Fully Agentic Coding** — Udemy (Aug 2026)
- **Practical GitHub Copilot** — LinkedIn Learning (Jun 2026)
- **Generative AI for Software Engineers & AI-Augmented SDLC** — Udemy (Jul 2026)
- **Spring 6 and Spring Boot 3 First Look** — LinkedIn Learning (May 2023)

PUBLICATIONS & TECHNICAL WRITING

- **"Introduction to Mockito Unit Testing Framework"** — Josh Software Engineering Blog — Comprehensive technical guide to mock-driven unit testing in Java
- **"Quick Overview of C++"** — Technical Blog — Structural overview of OOP fundamentals and systems programming concepts
- **"Linux System Administration & Configuration"** — Technical Blog — Practical guide to Linux/Fedora internals and package configuration

LANGUAGES

- English (Professional Working Proficiency) | Hindi (Fluent) | Marathi (Native)
